EFs working together

• Innovative Financial mechanisms for conservation
• Peer to Peer learning to achieve standards
• Knowledge sharing

Partners: FFEM, GEF/UNEP, CFA, Moore Foundation
What are we trying to answer?

• How innovative mechanisms for conservation or climate change, such as market-based instruments, can be scaled up to have relevant impact?
• What institutional structures need to be in place for such types of mechanisms?
• How to measure conservation/ climate change impacts and prove the effectiveness of such mechanisms?
